

“ My machinery is my biggest capital investment, but we are only as good as the throughput we get out of them. This course helped both seasoned and new operators learn the ins and outs of Elsner equipment so we are sure we are as productive as we can be in this competitive environment. ”

~ CANISTER WIPES
CONVERTER

AT ELSNER U, YOU...

ACCESS TO THE TEAM WHO BUILT YOUR MACHINE:

We can't stress enough how valuable the experience of our technicians is when it comes to understanding how to get the most out of your machinery. ELSNER U gives you access to the team who designs, builds, tests and sells the machines you rely on. In the ELSNER U course, we will share the full details of best practices for your converting operations.

ABILITY TO USE OUR MACHINE SO YOURS KEEPS RUNNING:

We know that throughput and productivity are where the buck stops which is why it can be a challenge to spend a lot of time training on your machinery when production demands outweigh taking breaks. We host ELSNER U from both our Elsner Tech Center and our machine-build assembly line, giving your team a great learning environment free from the distractions of everyday pressures.

**WE WANT TO MAKE SURE YOU ARE
GETTING THE MOST OUT OF YOUR
INVESTMENT.**

Converting equipment is expensive. You want to make sure you are using it to its maximum capability. The ELSNER University training allows you to keep up with proper operation, maintenance and adjustment procedures for your machines, all taught by the team who built them.

We customize the course for your specific machine: use the training to brush up on skills, onboard new operators and provide a built-in standard for your production team.
