

# PACO WINDERS ELSNER™

## Automatic Tube Recutters AR | HAR | LAR | EHR

- High-speed production - up to 50,000 cuts per hour
- Precise dust-free and burr-free knife cutting of light and heavy wall tubes
- Consistent cutting tolerance of + .005 (+.12mm)
- Full automatic loading and unloading with hopper-feeding of parent tubes
- Wide range of diameter and length configurations to meet your cutting requirements
- Varied cutting techniques for customer's requirements
- Polycarbonate enclosure guarding with a safety interlock; increases cutting visibility and decreases noise.
- Both tubing and knives are driven during cutting cycle for optimum finish
- Multi-knife recutting – the entire tube is cut simultaneously – no error from machine indexing.

Companies worldwide rely on PACO Winders & Elsner Engineering to supply and service their paper tube, can and core converting, winding and cutting requirements.
